

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. In this listing of claims, claims 5 and 20 have been amended and claims 35-44 have been added.

Listing of Claims:

1. (withdrawn) A method for interactive wagering on races, comprising:

receiving user inputs;

providing the user with an opportunity to initiate one of an expert wager input interface and a novice wager input interface;

presenting the user with a single selection window when the user initiates the expert wager input interface, wherein the single selection window comprises a plurality of user selectable wager options for a plurality of wager requirements for creating a wager; and

presenting the user with a sequence of selection windows when the user initiates the novice user input interface, wherein each selection window in the sequence of selection windows comprises a plurality of user selectable wager options for a different wager requirement for creating a wager.

2. (withdrawn) The method of claim 1, wherein at least one selection window in the sequence of selection windows presented when the user initiates the novice wager input interface further comprises a user selectable option that initiates the expert wager input interface when selected.

3. (withdrawn) The method of claim 1, wherein the single selection window presented when the user initiates the expert wager input interface further comprises a user selectable option that initiates the novice wager input interface when selected.

4. (withdrawn) The method of claim 2, further comprising transferring wager options selected in the novice wager input interface to the expert wager input interface when the user selectable option that initiates the expert wager input interface is selected.

5. (currently amended) A method for interactive wagering on horse races, comprising:

receiving user inputs; and

displaying a wager input interface for creating a wager on a horse race having a plurality of wager requirements, wherein the plurality of wager requirements comprises a track

selection, a race selection, a wager type selection, a horse selection, and an amount selection, and a plurality of selectable options for each of the plurality of wager requirements, wherein the wager requirements are displayed so that each wager requirement is substantially aligned in a first dimension, [[and]] wherein the plurality of selectable options for each of the plurality of wager requirements is displayed so that the plurality of selectable options is substantially aligned in a second dimension with each corresponding one of the plurality of wager requirements, and wherein the plurality of selectable options for a subsequent one of the wager requirements depends on a selection of one of the plurality of selectable options for a previous one of the wager requirements.

6. (canceled)

7. (previously presented) The method of claim 5, wherein the user inputs are used to select at least one of the plurality of selectable options for each of the plurality of wager requirements.

8. (previously presented) The method of claim 7, wherein the at least one of the plurality of selectable options that is selected using the user inputs is highlighted to

indicate that the at least one of the plurality of selectable options has been selected.

9. (previously presented) The method of claim 7, further comprising displaying a ticket window that indicates each of the plurality of selectable options selected using the user inputs.

10. (withdrawn) A method for interactive wagering on horse races, comprising:

receiving user inputs from a user;

displaying a plurality of options for each of a plurality of wager requirements for creating a wager, wherein the plurality of wager requirements comprises track, horse, wager type, and wager amount requirements for creating a wager; sequentially designating an option for each wager requirement based on user inputs; and

displaying after each designation, the designated option and all previously designated options for the wager as part of a simulated wager ticket.

11. (withdrawn) A method for interactive wagering on horse races, comprising:

receiving user inputs;

Application No. 09/330,651  
Amendment Dated April 12, 2004  
Reply to Office Action of December 10, 2003

providing a user with an ability to create a  
wager on a horse race; and

displaying a horse selection window for creating  
the wager on the horse race, wherein the horse selection window  
includes a plurality of horse selection options for the wager  
and a color indicator, wherein each of the horse selection  
options is capable of being highlighted by the user based on  
user inputs, and wherein the color indicator indicates a color  
that depends on which horse selection option is being  
highlighted.

12. (withdrawn) The method of claim 11, wherein the  
color of the color indicator is the same as the colors of a  
horse corresponding to the highlighted horse selection option.

13. (withdrawn) The method of claim 11, wherein the  
color of the color indicator is the same as the color of silks  
worn by a jockey corresponding to the highlighted horse  
selection option.

14. (canceled)

15. (withdrawn) A method for interactive wagering on  
horse races, comprising:

Application No. 09/330,651  
Amendment Dated April 12, 2004  
Reply to Office Action of December 10, 2003

receiving user inputs;  
selecting wagering options based upon the user  
inputs to create a first wager on a horse race;  
placing the first wager using the wagering  
options; and  
presenting the selected wagering options as  
default selections in a subsequent wager entry process, wherein  
wagering options other than the default selections are available  
for selection in the subsequent wager entry process.

16. (withdrawn) A system for interactive wagering on  
races, comprising:

a user input device that receives user inputs;  
and  
control circuitry that:  
receives the user inputs from the user input  
device;  
provides the user an opportunity to initiate  
one of an expert wager input interface and a novice wager input  
interface;  
presents the user with a single selection  
window when the user initiates the expert wager input interface,  
wherein the single selection window comprises a plurality of

user selectable wager options for a plurality of wager requirements for creating a wager; and

presents the user with a sequence of selection windows when the user initiates the novice wager input interface, wherein each selection window in the sequence of selection windows comprises a plurality of user selectable wager options for a different wager requirement for creating a wager.

17. (withdrawn) The system of claim 16, wherein at least one selection window in the sequence of selection windows presented when the user initiates the novice wager input interface further comprises a user selectable option that initiates the expert wager input interface when selected.

18. (withdrawn) The system of claim 16, wherein the single selection window presented when the user initiates the expert wager interface further comprises a user selectable option that initiates the novice wager input interface when selected.

19. (withdrawn) The system of claim 17, wherein the control circuitry transfers options selected in the novice wager input interface to the expert wager input interface when the

Application No. 09/330,651  
Amendment Dated April 12, 2004  
Reply to Office Action of December 10, 2003

user selectable option that initiates the expert wager input interface is selected.

20. (currently amended) A system for interactive wagering, comprising:

a user input device that receives user inputs;

and

control circuitry that receives the user inputs and that displays a wager input interface having a plurality of wager requirements, wherein the plurality of wager requirements comprises a track selection, a race selection, a wager type selection, a horse selection, and an amount selection, and a plurality of selectable options for each of the plurality of wager requirements, wherein the wager requirements are displayed so that each wager requirement is substantially aligned in a first dimension, [[and]] wherein the plurality of selectable options for each of the plurality of wager requirements is displayed so that the plurality of selectable options is substantially aligned in a second dimension with each corresponding one of the plurality of wager requirements, and wherein the plurality of selectable options for a subsequent one of the wager requirements depends on a selection of one of the

plurality of selectable options for a previous one of the wager requirements.

21. (canceled)

22. (previously presented) The system of claim 20, wherein the user inputs are used to select at least one of the plurality of selectable options for each of the plurality of wager requirements.

23. (previously presented) The system of claim 22, wherein the at least one of the plurality of selectable options that is selected using the user inputs is highlighted by the control circuitry to indicate that the at least one of the plurality of selectable options has been selected.

24. (previously presented) The system of claim 23, wherein the control circuitry also displays a ticket window that indicates each of the plurality of selectable options selected using the user inputs.

25. (withdrawn) A system for interactive wagering on races, comprising:

a user input device that receives user inputs from a user; and

Application No. 09/330,651  
Amendment Dated April 12, 2004  
Reply to Office Action of December 10, 2003

control circuitry that:

displays a plurality of options for each of  
a plurality of wager requirements for creating a wager, wherein  
the plurality of wager requirements comprises track, horse,  
wager type, and wager amount requirements for creating a wager;

sequentially designates an option for each  
wager requirement based on user inputs; and

displays after each designation, the  
designated option and all previously designated options for the  
wager as part of a simulated wager ticket.

26. (withdrawn) A system for interactive wagering on  
horse races, comprising:

a user input device that receives user inputs;  
and

a control unit that:

receives the user inputs;

provides a user with an ability to create a  
wager on a horse race; and

displays a horse selection window for  
creating the wager on the horse race, wherein the horse  
selection window includes a plurality of horse selection options  
for the wager and a color indicator, wherein each of the horse

Application No. 09/330,651  
Amendment Dated April 12, 2004  
Reply to Office Action of December 10, 2003

selection options is capable of being highlighted by the user based on user inputs, and wherein the color indicator indicates a color that depends on which horse selection option is being highlighted.

27. (withdrawn) The system of claim 26, wherein the color of the color indicator is the same as the colors of a horse corresponding to the highlighted horse selection option.

28. (withdrawn) The system of claim 26, wherein the color of the color indicator is the same as the color of silks worn by a jockey corresponding to the highlighted horse selection option.

29. (canceled)

30. (withdrawn) A system for interactive wagering, comprising:

a user input device that receives user inputs;

and

control circuitry that:

receives the user inputs;

selects wagering options based upon the user inputs to create a first wager on a horse race;

places the first wager using the wagering options; and

presents the selected wagering options as default selections in a subsequent wager entry process, wherein wagering options other than the default selections are available for selection in the subsequent wager entry process.

31. (withdrawn) The method of claim 3, further comprising transferring options selected in the expert wager input interface to the novice wager input interface when the user selectable option that initiates the novice wager input interface is selected.

32. (withdrawn) The system of claim 18, wherein the control circuitry transfers options selected in the expert wager input interface to the novice wager input interface when the user selectable option that initiates the novice wager input interface is selected.

33. (withdrawn) The method of claim 11, wherein the color indicator is an image of a jockey and a horse.

34. (withdrawn) The system of claim 26, wherein the color indicator is an image of a jockey and a horse.

35. (new) The method of claim 5, wherein the previous wager requirement is the track selection and the subsequent wager requirement is the race selection.

36. (new) The method of claim 5, wherein the previous wager requirement is the race selection and the subsequent wager requirement is the wager type selection.

37. (new) The method of claim 5, wherein:  
the previous one of the wager requirements comprises two wager requirements, wherein the two wager requirements are the track selection and the race selection; and  
the subsequent wager requirement is the wager type selection.

38. (new) The method of claim 5, wherein the previous wager requirement is the race selection and the subsequent wager requirement is the horse selection.

39. (new) The method of claim 5, wherein the previous wager requirement is the wager type selection and the subsequent wager requirement is the horse selection.

40. (new) The system of claim 20, wherein the previous wager requirement is the track selection and the subsequent wager requirement is the race selection.

41. (new) The system of claim 20, wherein the previous wager requirement is the race selection and the subsequent wager requirement is the wager type selection.

42. (new) The system of claim 20, wherein:  
the previous one of the wager requirements comprises two wager requirements, wherein the two wager requirements are the track selection and the race selection; and  
the subsequent wager requirement is the wager type selection.

43. (new) The system of claim 20, wherein the previous wager requirement is the race selection and the subsequent wager requirement is the horse selection.

44. (new) The system of claim 20, wherein the previous wager requirement is the wager type selection and the subsequent wager requirement is the horse selection.
